### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jennifer Seng on July 1, 2007.

The application has been amended as follows:

In claim 1, line 4, "and a Monney viscosity" has been substituted by --and a Mooney viscosity--.

The following is an examiner's statement of reasons for allowance: The closest prior art of record does not teach that the polymer does not comprise a multiolefin monomer, a conjugated diene, or a beta-pinene. Kaszas (WO 02/16452) teaches a butyl polymer comprising a C<sub>4</sub> to C<sub>7</sub> monoolefin monomer, a multiolefin cross-linking agent, and a chain transfer agent. However, Kaszas also teaches that the polymer contains a C<sub>4</sub> to C<sub>14</sub> multiolefin monomer or beta-pinene. The art does not teach or suggest a reason to remove the multiolefin monomer from the polymer. The novelty of these claims lies in the removal of the multiolefin monomer, conjugated diene, or beta-pinene from the polymer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
